

APPENDIX 1

HEALTH & SAFETY DECLARATION, ROLES AND RESPONSIBILITIES

Each exhibitor and Informa appointed contractor must complete the 'Health and Safety Declaration' form provided below to confirm they have risk assessments in place for their stand and/or activities. In addition, they should also confirm in the declaration that their contractors have completed a risk assessment, where relevant, for the stand build and subsequent dismantling operations and have a written method statement for these activities.

The individuals with overall responsibility for the health and safety for the exhibitor stand and associated construction must be identified on the declaration. These individuals are responsible for ensuring the Health & Safety Rules and Regulations are adhered to and that their staff and contractors work safely.

Exhibitors for SPACE ONLY (FREE BUILD) stands are required to submit the risk assessment and method statement for the stand construction (and dismantling) and for their activities to the Informa Event Organiser. SHELL SCHEME exhibitors may be required to provide copies of their risk assessment on request to assist the organisers in fulfilling their own health and safety obligations. SHELL SCHEME exhibitors, who are providing demonstrations involving the public which involve significant hazards, for example with the potential for falls from height or strenuous physical exertion, are required to be notified in advance to the Informa Event Organiser.

Guidelines to assist with completing risk assessments and method statements are provided below.

EXHIBITORS AND CONTRACTOR'S HEALTH & SAFETY DECLARATION

Compulsory

Please fill in form, tick the boxes that apply, providing supporting information and submit by:

(date)

If you have any queries please contact the Event Organiser

For Exhibitors:

We have a Table Top (Pop-Up) Stand.

We have trained and made our stand staff aware of the hazards to be expected on site. We have read and are committed to following the 'Health & Safety Rules' in the Exhibitor's Manual. We have completed a risk assessment and conclude that our exhibits, demonstrations and work practices will cause no significant risk to either others or ourselves on site. The risk assessment is available on request.

We have a SHELL SCHEME stand.

We have trained and made our stand staff aware of the hazards to be expected on site. We have read and are committed to following the 'Health and Safety Rules' in the Exhibitor's Manual. We have completed a risk assessment and conclude that our exhibits, demonstrations and work practices will cause no significant risk to either others or ourselves on site. The risk assessment is available on request.

We have a SHELL SCHEME stand with Product Demonstration / Activities.

We have trained and made our stand staff aware of the hazards to be expected on site. We have read and passed them the 'Health and Safety Rules' in the Exhibitor's Manual and are satisfied they are competent to undertake their tasks safely. We have ensured that a risk assessment is carried out for any proposed stand activities, product demonstrations and public demonstrations. Where the activity or product demonstration gives rise to significant risk full details have been submitted to the organiser with a copy of the risk assessments, method statement and stand plans / product specification.

We have a SPACE ONLY (Free Build) stand and have not appointed contractors.

We have a risk assessment and method statement prepared for our exhibits, demonstrations and work practices and have brought the findings to the attention of our stand staff together with the 'Health and Safety Rules' in the Exhibitor's Manual, which we have read. Our risk assessment, method statement and stand plans have been forwarded to the Event Organiser at Informa.

We have a SPACE ONLY (Free Build) stand and have appointed contractors to design, build and/or dismantle our stands.

We have read and passed on the 'Health and Safety Rules' contained within the Exhibitor's Manual to our contractors and staff and are satisfied that they are competent to undertake their tasks safely. We have checked that our contractors have prepared a specific risk assessment, method statement and stand plans for the event and passed the relevant safety information on to their staff and sub-contractors. In turn we have completed our own risk assessment for our exhibits and demonstrations. All risk assessments, method statement and stand plans for our event have been forwarded to the Event Organiser at Informa.

We are a Co-exhibitor and are not involved with the construction or set-up of the stand.

We have completed a risk assessment and conclude that our exhibits and demonstrations will cause no significant risk to either others or ourselves on site. The risk assessment is available on request.

Our contractors will be using **access tower scaffolds** and I understand these will be subject to inspection by the Organiser.

PLEASE NOTE THAT EXHIBITOR/CONTRACTOR PASSES WILL NOT BE ISSUED IF THIS FORM IS NOT RETURNED

EXHIBITORS AND CONTRACTOR'S HEALTH & SAFETY DECLARATION

For Informa Contractors

- We have trained and made our staff and sub-contractors aware of the hazards to be expected on site. We have read and are committed to following the 'Health & Safety Rules' in the Exhibitor's Manual. We have completed a specific risk assessment and method statement for our work at this event, which also encompasses any work undertaken by sub-contractors, and provided these to the Event Organiser at Informa.
- Our contractors will be using **access tower scaffolds** and I understand these will be subject to inspection by the Organiser.

APPENDIX 2

EXHIBITOR'S AND CONTRACTOR'S GENERAL RISK ASSESSMENT

Guidance & Completion of Form

Introduction

Informa requires exhibitors and contractors to conduct a risk assessment of their activities in order to ensure that health and safety issues are identified and addressed prior to the event. Many employers have their own system for completing risk assessments but, if you do not already have a system, you may wish to use the attached form.

Contractors are also required to complete a method statement for the build and dismantling stages of the exhibition. An example of a method statement format is also attached for your use if this will assist with the completion of this document.

The Informa Event Organiser will require copies of risk assessment and method statement from SPACE ONLY (Free Build) exhibitors to be sent to them. SHELL SCHEME exhibitors may be required to show a copy of their risk assessment upon request and in the situation where they provide exhibits involving the public that potentially involve significant risk.

// ...the use of inappropriate materials that do not meet the applicable international standards for fire resistance present a significant fire risk. //

Scope Of The Risk Assessment

The risk assessment should cover the activities surrounding the build stage of the stand together with the activities undertaken at the stand during the exhibition and during the dismantling stage.

Construction and dismantling of SPACE ONLY (Free Build) stands will present a potentially higher risk than SHELL SCHEME stands. This is due to the usually larger scale of the build operation and the potential for accidents arising from the equipment used and the work methods adopted (e.g. working at a height) and potential crossover with other exhibition and venue activities. The size, height and weight of the structure often associated with SPACE ONLY stands will also present a greater potential for collapse and injury unless properly designed, planned and subsequently built. Furthermore, the use of inappropriate materials that do not meet the applicable international standards for fire resistance present a significant fire risk. In these situations, action will be taken by the venue to remove electrical power to the offending stand.

Using The Risk Assessment And Method Statement Forms

The form is designed to enable you to complete a basic risk assessment. It should be completed in conjunction with your contractors erecting and dismantling the stand. It includes the key risk control measures, which, if adopted, will assist you in complying with the requirements of the venue and organisers. You can demonstrate that you are committed to implementing the control measures by marking against each one. Where you have additional hazards and are implementing further controls these can be entered in the table together with any further comments.

Company Name General Risk Assessment for
Stand Number (where applicable) at (EVENT)

METHOD STATEMENT - GUIDANCE FOR COMPLETION

METHOD STATEMENT FOR FOLLOWING ACTIVITIES:	
EXHIBITORS NAME:	CONTRACTORS NAME:
EVENT NAME AND DATE:	STAND NO:
Exhibitor Contact Details:	<i>E.g. the employee who will be responsible for the contractor on site. Please add all contact details including name, mobile number and position within your company.</i>
Responsible Person Contact Details:	<i>E.g. the employee who will be responsible for the construction and breakdown of your stand or carrying out the specified activities. Please add all contact details including name, mobile number and position within your company.</i>
Stand or Activity Details & Location:	<i>E.g. the logistics, vehicle movements, loadings, dimensions, location, or unusual stand features (as relevant).</i>
Access:	<i>Details of the entry point into the halls and the route to the final position.</i>
Step-by-step Sequence for the structure:	<i>Full Details of the sequence and schedule in which all works will be undertaken or stand elements will be built, including alignment, electrical connection, lifting and so forth.</i>
Stability:	<i>Detail the methods of ensuring adequate structural support of any stand element or structure that requires cross bracing, with calculations and inspection certificate from an independent structural engineer – include steps of the build.</i>
Lifting:	<i>Outline all of the equipment that will be used, their capacities, weight, locations and floor loadings. Check training qualifications and machinery inspection certificates.</i>
Working at Height:	<i>Include All Details of working at height. E.g. temporary and mobile scaffolds, access towers and other work at height, which you intend to carry out. Detail how you will ensure safety when working at height and confirm competency of staff involved. Scaffold towers incorrectly or incompletely assembled will be removed from the Hall. For double decked explain when handrails will be completed for the upper deck, is it prior to lifting and will the floor be complete? If not explain the means of edge protection that has been designed during the construction.</i>
Hazardous Substances:	<i>What substances will be used? Any proposed use of hazardous substances other than small quantities used for the stand build and cleaning must be advised to the organisers and venue. Any hazardous substance must have a safety data sheet available for inspection on site. Any substance deemed hazardous which cannot be adequately controlled will be removed from the Hall.</i>
Environment:	<i>Consider any abnormal noise that will be present or work which may create dust or fumes. What ventilation and other control measures will be provided.</i>
Services:	<i>Note where electrical work will be carried out or other services such as compressed air will be brought onto site. Be aware of any restrictions laid down in the safety rules.</i>
First Aid & Emergency Procedures:	<i>Identify the first aid and emergency procedure that you will need on site and highlight any hazardous work that may need extra first aid (e.g. burns, electrical, chemical)</i>
Safety Features:	<i>Identify the safety equipment and precautions that you will be providing on site, including protective measures that you will be implementing for all of the above, and areas of risk as highlighted by your risk assessment.</i>
Exhibits (where applicable):	<i>Provide the organisers with any/all details on exhibits, which may present a risk to the public and/or the operator and the controls that will be put in place.</i>
Arrangements for Safe Dismantling:	<i>Describe methods involved during event breakdown to plan the breakdown phase to avoid hazards arising from falling materials, moving vehicles, poor housekeeping etc.</i>
